

How We Work | Skyline's Theory of Change

Skyline works to provide intensive support for high ability students who are gifted and/or academically talented, with a growth mindset, leadership potential, and resilience in the face of their social and economic challenges. We support them to find pathways to further study and employment – becoming leaders for change. The unique VCE two-year Skyline Program experience includes residential and masterclass components, financial reimbursement and personal support, consolidated by lifelong connection in an inclusive, respectful and supportive alumni network.
